Commissioner Deborah Taylor Tate

Dear Commissioner Tate,

The airwaves belong to the public, not corporations like Verizon and AT&T whose anti-competitive practices have resulted in the U.S. falling to 16th in the world in high-speed Internet rankings.

To restore America's leadership in high speed Internet services, the FCC must ensure that the upcoming auction sets aside at least 30 MHz of spectrum for open and non-discriminatory Internet access. This will guarantee that new entrants have the opportunity to enter the market in competition with incumbent providers.

It would be a big mistake to hand over these airwaves to the very same phone and cable companies that dominate the wireline market. We need more competition and innovation, not more of the same. This new wireless spectrum must be open and neutral so that America can build a better Internet for everyone.

Sincerely,  
John Blalock

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet  
-- but bad policies allow companies like AT&T and Verizon to  
shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use our  
public spectrum to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive  
wholesale marketplace.
3. The freedom to access any content or services we want through  
our devices.

These true open access standards should apply to the entire  
wireless market.

Sincerely,

peter panos
